

## Research interests

**Broadly**—Understanding the effects of human activities and climate change on the preservation of Mediterranean oak woodlands, as well as the habitats they support, including shrublands and riparian habitats.

I am also excited about applying conceptual, mathematical, and statistical approaches to tackle ecological and biodiversity conservation questions.

## Employment

2023 – ?

### **Auxiliary researcher**

Centro de Investigação em Biodiversidade e Recursos Genéticos (CIBIO/Biopolis)

I am working in the project “NaturaConnect - Designing a resilient and coherent Trans-European network for nature and people” which is funded under the European Union’s Horizon Europe Research and Innovation Programme. I am involved in "Work Package 6 -Multi-scale nature connectivity and corridors design" and "Work Package 8 - Showcasing the implementation of TEN-N", and I will be working on "Task 6.1 - Connectivity knowledge exchange: identifying planning priorities and landscape elements for ecological corridors", "Task 6.2 - Functional connectivity for network design: form species and demographic traits to ecological corridor design" and "Task 8.4 - Case study national level - Portugal".

2019 – 2022

### **Auxiliary researcher**

Centro de Investigação em Biodiversidade e Recursos Genéticos (CIBIO/Biopolis)

I worked as a contracted researcher on the project "RIVERSCALE - Ecological patterns and processes across scales: application to river networks (PTDC/BIA-ECO/28729/2017 – POCI-01-0145-FEDER-028729)" under the leadership of Dr. Luís Borda de Água and co-lead of Dr. Patrícia Rodríguez-González. My main focus was on analyzing how diversity patterns of riparian plant communities change across different scales using Bayesian methods.

2011– 2022

### **Data analyst and Biodiversity and Ecosystem services consultant**

Associação Natureza Portugal/WWF Portugal

I was responsible for processing and analyzing biodiversity and ecosystem services data. My role involved overseeing the HABEaS Project ([www.habeas-med.org](http://www.habeas-med.org)), an online geographic information system that offers free access to biodiversity and ecosystem services data. I was also responsible for providing quantitative data to support ongoing biodiversity conservation projects and project funding proposals.

2016 – 2019

### **Postdoctoral fellow**

Centro de Ecologia Aplicada “Prof. Baeta Neves”, Instituto Superior de Agronomia, Universidade de Lisboa

I conducted research that involved reviewing the existing literature on the effects of forest certification on biodiversity conservation. Additionally, I analyzed the factors that influence visitation rates in protected areas and the Natura 2000 network in Portugal. Lastly, I examined the factors that influence changes in forest cover in Mediterranean oak woodlands.

2008 – 2009

### **Research assistant**

Faculdade de Ciências, Universidade de Lisboa

I worked as a research assistant on the project "Assessing the effectiveness of mitigation measures in reducing the negative impacts of highways," funded by BRISA "Auto-estradas de Portugal, SA." My main responsibilities included trapping and capturing stone martens (*Martes foina*) and utilizing radio-tracking techniques to monitor their movements in relation to a major highway in Southern Portugal. Additionally, I

played a crucial role in developing a geographic information system to analyze the collected data and conducted statistical analyses to assess habitat selection and movement patterns.

## Education

- 2011–2016 **PhD, Forestry and Natural Resources, Instituto Superior de Agronomia, Univ. de Lisboa**  
Advisors: Miguel N. Bugalho and Jorge Orestes Cerdeira  
Thesis: [The Role of Forest Certification for the Conservation of Biodiversity and Sustainability of Cork Oak Woodlands](#)
- 2007–2008 **Master of Science, Conservation Biology, Faculdade de Ciências, Universidade de Lisboa**  
Advisors: Margarida Santos-Reis  
Thesis: Multi-Scale Analysis of Carnivores' Road Mortality Patterns in Highways: A Case Study with the Stone Marten and the Common Genet
- 2003–2007 **Degree in Environmental Biology, Faculdade de Ciências, Universidade de Lisboa**

## Invited talks and conferences

### *Invited talks*

- 2023 **How to Manage and Process Big Datasets in R - an Example with eBird Data**  
Instituto Superior de Agronomia, CIBIO’s Journal Club, March 23th. [Link](#)
- 2014 **Como utilizar o software R através do QGIS**  
University of Évora, [Link](#)
- 2012 **HABEaS WebGIS: Practical applications**  
Course “Evaluating ecosystem services for decision-making”, Natural Capital Project, Instituto Superior Técnico

### *Conferences*

- 2023 **A unified approach to the species-area-relationship using statistics of extremes**  
GfÖ Annual Meeting 2023, Leipzig  
Borda-de-Água, L., Quoss, L., Dias, F.S., Neves, M., Hubbell, S.P., Pereira, H.M.
- 2023 **Use of remote sensing to evaluate effects of postfire emergency stabilization on oak forests recovery**  
8<sup>th</sup> International Wildfire Conference, Porto, Portugal  
Lopes, L.F., Dias, F.S., Fernandes, P., Acácio, V.
- 2021 **Analysing the distance decay of community similarity in river networks using Bayesian methods.**  
20<sup>o</sup> Encontro Nacional de Ecologia, Escola Superior Agrária Ponte de Lima, Portugal  
Filipe S. Dias, Michael Betancourt, Patricia María Rodríguez-González, and Luís Borda-de-Água
- 2019 **Long-term dynamics of canopy cover in Mediterranean evergreen oak woodlands reveals a degradation trend determined by management and climate**  
15th EEF - European Ecological Federation Congress, Lisbon, Portugal  
Acácio, V., Dias, F.S., Catry, F.X., Bugalho, M., Moreira F.
- 2016 **Landscape dynamics in Mediterranean oak forests under global change: understanding the role of anthropogenic and environmental drivers across forest types**  
Seminário “Ecologia, Florestas e Conservação” do Centro de Estudos Florestais e CEABN. Instituto

Superior de Agronomia, Lisboa, Portugal

Acácio, V., Dias, F.S., Catry, F.X., Rocha, M., Moreira, F

2016 **Landscape dynamics in Mediterranean oak forests under global change: understanding the role of anthropogenic and environmental drivers across species**

World Congress Silvo-Pastoral Systems 2016, University of Évora, Évora, Portugal

Acácio, V., Dias, F.S., Catry, F.X., Rocha, M., Moreira, F., 2016

2009 **Multi-scale analysis of road mortality patterns: a case study with the stone marten and the common genet.**

IENE-Infra Eco Network Seminar "Connecting Wildlife and People, Évora

Dias, F. S., Grilo, Clara; Ascensão, Fernando; Santos-Reis, Margarida.

## Advising

Past Master students

2014 **Berta Briñas García**, Erasmus Mundus, Instituto Superior de Agronomia

Thesis: Mapping and identification of hotspots for biodiversity and ecosystem services in cork oak woodlands in Portugal."

With Miguel N.Bugalho

## Teaching experience

2011 **Biodiversidade Ambiente e Conservação, Instituto Superior de Agronomia**

Assistant lecturer

With Jorge Orestes Cerdeira, Diogo Alagador, Tiago Monteiro-Henriques

Students: ~25

## Skills

**Statistical analysis** – I have extensive experience with both frequentist and Bayesian methods using Stan's probabilistic programming language (<https://mc-stan.org/>).

**Data wrangling** - I have been using R for data wrangling for 15+ years and I am comfortable both its native syntax and the tidyverse ecosystem of packages (<https://www.tidyverse.org/>).

**Geographic Information Systems** – I have extensive experience in processing and analyzing geographical data using free and open-source software like QGIS, GRASS GIS, GDAL, and PostGIS.

**Fieldwork experience** - I have experience working with mammal carnivores, including trapping and radio tracking. I have also conducted vegetation surveys to assess tree regeneration, shrub cover, and forest structure. Additionally, I am skilled in assessing the ecological condition of streams using the Stream Visual Assessment Protocol (SVAP). Furthermore, I have an intermediate level of expertise in birding.

**Scientific communication and dissemination** – I have experience in effectively communicating scientific research to non-scientific audiences and writing non-technical reports. I am used to working in multidisciplinary environments and I have a lot experience with engaging with individuals from diverse backgrounds.
